

Secure, Streamlined, Touchless COVID-19 Check In Process

Safe Site Check In is the fastest and easiest way for construction site supervisors, safety officers, human resources and managers to ensure employees are symptom-free of COVID-19, and the company is in compliance with state and

federal health directives and safety guidelines. Safe Site Check In does not collect personal health information yet enables employers to support contact tracing, providing peace of mind to employees, visitors and contractors.

Health & Safety Screening Protects Your Business

-  Stay open by following state and federal health and safety guidelines for employees and visitors
-  Securely run and manage private health screenings
-  Quickly set up, customize questions and scale across multiple sites
-  Get automatic alerts to potential issues and the assurance that everybody has checked in and is symptom-free
-  Save hours each week by streamlining the job site check-in process
-  Easily track when people have entered a site and avoid the need to manually review hard copy logs in an emergency

Touchless, Mobile Check In Process Makes It Easy for Employees and Visitors to Comply

Quick & private screenings

Protects personal health information

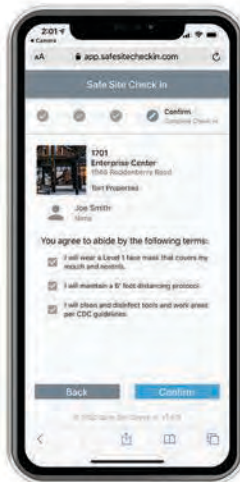

Multi-language support

How It Works

Open the camera app on your smartphone and point it at the unique QR code on the sign posted at check in.

Use this QR Code to try it now.

Click on the prompt to open the web page and start the check in process.

You'll be asked to answer the COVID-19 health screening questions.

Once you submit your answers to the health screening questions, you'll immediately receive a notification letting you know it's ok to enter the site or if you should check in with a supervisor prior to entry.

Safe Site Check In makes the health screening process simple, so you can keep sites open and focus on keeping your business running smoothly.
